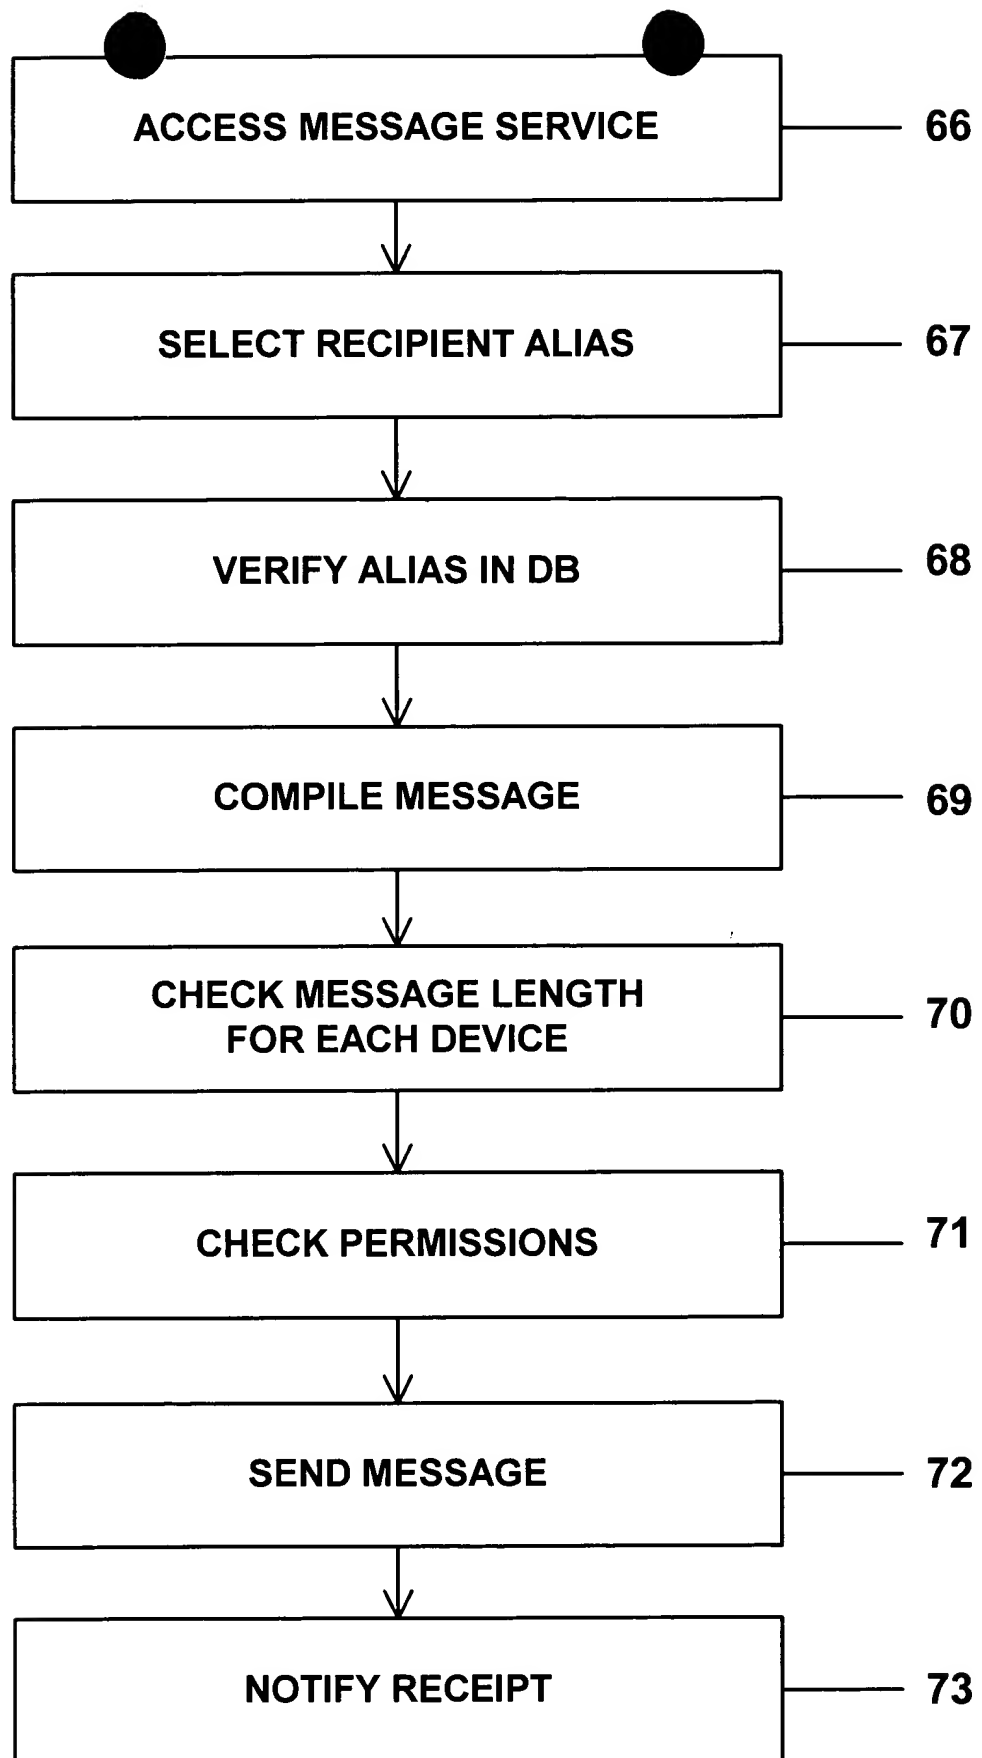

FIGURE 4

The diagram illustrates a network architecture for voice and data communication. It features several interconnected components:

- Top Internet Cloud (28):** Labeled "INTERNET". It is connected to the **SP** box via a "VPN" link and to the **MNET** box via a bidirectional link.
- Bottom Internet Cloud (29):** Labeled "INTERNET". It is connected to the **MNET** box via a bidirectional link and to the **SENDER** box via a "TEXT/ALPHA VOICE" link.
- MNET (20):** A central network element. It is connected to the **DB** box via a bidirectional link and to the **VOICE** output via a bidirectional link.
- DB (26):** A database component connected to the **MNET** box.
- SP (31):** A source point connected to the **REC.** box via a direct line and to the top Internet cloud via a "VPN" link.
- REC. (32):** A receiver point connected to the **SP** box and the **SENDER** box.
- SENDER (30):** A sender point connected to the bottom Internet cloud and the **REC.** box.

Additional labels include "VOICE" at the bottom left and "TEL" near the **REC.** box, indicating the nature of the communication.
